# TrackAttack<sup>®</sup> Specifications

Model No.	Track Centre Width	Notes
283OTAT	3m	Renovate at 2m or 3m wheel tracks
284OTAT	4m	Renovate at 2m, 3m or 4m wheel tracks

Category 3, Three Point Linkage Mount

The TrackAttack<sup>®</sup> by K-Line Ag is designed to level out wheel tracks, ruts and uneven terrain. The front row of discs cut through the ground, loosening and moving the soil onto the tram-line, then the crumbler roller follows behind breaking down the soil and cloddy dirt. This leaves the tram-line with a flat and even weed free surface, making it easier and smoother for equipment to pass.

*Optional 3 & 4 Row Spring Tine Harrows can be attached for levelling in heavy black soils*
